VISHWAJEET SURVASE

Aspiring AI Engineer | Python & Machine Learning Enthusiast

+91 8668636394 | vishwajeetsurvase28@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science and Engineering student interested in building practical AI and software solutions. Hands-on project experience across Python-based machine learning experiments, API-integrated web applications, chatbot development, and research-paper discovery. Brings a combination of analytical thinking, UI awareness, self-directed learning, and collaborative leadership.

TECHNICAL SKILLS

Programming: Python, JavaScript, C, C++, Java
AI / ML: Machine Learning fundamentals, NLP, Deep Learning concepts, model evaluation, PyTorch
Web Development: HTML, CSS, Node.js, React.js, REST/API integration
Databases & Tools: JSON-based storage, DBMS fundamentals, Git, GitHub, VS Code
Design: UI/UX, Figma, graphic design

PROJECTS

NeuralBias — AI News Bias Analyzer | *Python, NLP, scikit-learn, Transformers*
- Built a news-analysis project to classify political leaning and explore sentiment and emotional tone in articles.
- Experimented with TF-IDF and Logistic Regression baselines, followed by DistilBERT sequence classification; evaluated model performance and observed the challenges of reliable bias classification.

Live link: https://news-bias-detection.onrender.com

Mentor AI — AI Learning Platform & Chatbot | *HTML, CSS, JavaScript, Node.js, APIs*
- Developed an interactive chatbot experience with API integration and JSON-based storage.
- Implemented conversation handling and a basic memory mechanism to support contextual interactions, with a responsive frontend.

Live link: https://ai-mentor-6zkp.onrender.com

Research Paper Search Engine | *JavaScript, APIs, HTML, CSS*
- Created a web application to search for academic papers and present results in a structured interface.
- Integrated external research-data sources and query-based filtering to help users discover relevant papers.

Real-Time Process Monitoring Dashboard | *Node.js, JavaScript*
- Built a dashboard to monitor CPU and memory usage and display active processes with live updates.
- Developed system-metric collection logic and an interactive interface for observing resource usage.

EDUCATION

Lovely Professional University, Punjab | B.Tech, Computer Science and Engineering | Aug 2024 – Present
CGPA: 7.23/10
Janavikas Mahavidyalaya, Maharashtra | Senior Secondary (Science), 2022–2024 | 81.77%
Pramod Ji Mahajan New English School, Maharashtra | Secondary School, 2018–2020 | 99.00%

CERTIFICATIONS & ACHIEVEMENTS

- Programming Using C++ — Infosys Springboard (2025); React.js Certification — Tech Veda (2025).
- Computer Programming (72 hours) — Lovely Professional University / iamneo (2025).
- Cyber Security & Ethical Hacking Workshop — Secuneus Technologies (2024); CyberSmart volunteer.
- 2nd Runner-up — LPU University Hackathon, “Web-E-Thon”; Head of Tech Team, INFERNO Club.
